Shopping Cart Low-fi Prototype

The lo-fi prototype for shopping cart shows the design concept as well as the elements. The header remains the same as the rest of the site. For the actual item being added to the shopping cart, it will display the item's picture, name, color, material, size, price, quantity, as well as subtotal. The shopping cart also has a "x" to allow users delete the item. The bottom right section will be the shipping info as well as the total price. Another button at the bottom will take users to the checkout page.
